Chris 07988179838 – we can make bespoke sizes to order

<ol style="list-style-type: none">1. Unpack the contents of the pack.2. The pack for 1 trough should consist of<ul style="list-style-type: none">2 x planed boards2 x planed boards with rail on2 x End boards16 x 2 inch screwsBottom boards Recommended Tools Cordless drill / screwdriver Phillips type screwdriver	
<ol style="list-style-type: none">3. Lay the end boards approx 1m apart on a level floor.4. Line the planed board (planed side to the outside board with no rail on!) with the top of the end board.5. Make sure that the planed board is square to the top and sides of the end board.	<p>As the holes are already drilled, secure the planed board to the end boards with the screws provided. Turn over the trough and repeat for the other side. Make sure the board with the rail is on the bottom Place the trough in an upright position and place the slats in the base, on the rails.</p> 
<p>I hope these instructions are useful and enable you to construct an attractive and stable Larch trough.</p>
